NEW STREAMLINED DOWNDRAFT DESIGN!

- Is your shop crowded with equipment?
- Are you welding, deburring, grinding, sanding, gluing, or blowing off parts?
- Is dust, smoke, or fumes causing poor indoor air quality?
- Are you looking for a cost-effective solution?

...then the PT2032 may be perfect for you!

DualDraw has some exciting news - one of our most popular products is now even better. We recently redesigned our PT2032 Portable Downdraft table and have improved its versatility, efficiency, and safety. It has a smaller footprint and a more effective filtration system – perfect for a single operator workstation.

The redesign utilizes the DualDraw patented downdraft technology and works great for a variety of applications. Whether you are trying to protect your operators' breathing zones, maintain a clean workspace, or both; the new PT2032 is the solution for you.

PT2032 REDESIGN HIGHLIGHTS:

- 21% reduction in footprint size; will fit in more locations in your shop
- 20"D x 32"W work surface; 39"D x 32"W x 52"H footprint
- Baffling system re-engineered for fire safety; maximizes length of spark travel
- Low flow (1200) and high flow (2000) CFM options; fit to your application
- 115V single phase; can be located within feet of any standard 115V outlet
- Thermally protected for operator safety
- Powder coat paint finish; choose your color
- Locking caster wheels; standard for ease of movement
- Replaceable pleated panel filters; 95% efficient to 0.7 micron or HEPA available
